Secure Broadcast Communication: In Wired and Wireless Networks

Adrian Perrig, J.D. Tygar

Secure Broadcast Communication: In Wired and Wireless Networks Adrian Perrig, J.D. Tygar

Secure Broadcast Communication in Wired and Wireless Networks presents a set of fundamental protocols for building secure information distribution systems. Applications include wireless broadcast, IP multicast, sensor networks and webs, ad hoc networks, and satellite broadcast. This book presents and compares new techniques for basic operations including:

- *key distribution for access control,
- *source authentication of transmissions, and
- *non-repudiation of streams.

This book discusses how to realize these operations both with high performance processors and resource constrained processors. It shows how to protect against adversaries who inject packets or eavesdrop. The focus is on functional descriptions rather than theoretical discussions. Protocols are presented as basic building blocks that can be combined with each other and traditional security protocols. The book illustrates these protocols in practice by presenting a real implementation that provides security for an ad hoc sensor network.

This book can serve as a textbook or supplementary reading in graduate level courses on security or networking, or can be used for self study.

From reader reviews:

Shirley Glover:

The book untitled Secure Broadcast Communication: In Wired and Wireless Networks is the publication that recommended to you to read. You can see the quality of the e-book content that will be shown to a person. The language that creator use to explained their ideas are easily to understand. The article writer was did a lot of investigation when write the book, so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Secure Broadcast Communication: In Wired and Wireless Networks from the publisher to make you more enjoy free time.

David Wolverton:

Playing with family in a park, coming to see the ocean world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Secure Broadcast Communication: In Wired and Wireless Networks, you are able to enjoy both. It is great combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout men. What? Still don't obtain it, oh come on its referred to as reading friends.

Curtis Phillips:

The book untitled Secure Broadcast Communication: In Wired and Wireless Networks contain a lot of information on this. The writer explains the woman idea with easy method. The language is very clear and understandable all the people, so do not worry, you can easy to read the idea. The book was authored by famous author. The author will bring you in the new time of literary works. You can actually read this book because you can keep reading your smart phone, or program, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can start their official web-site as well as order it. Have a nice learn.

Suzanne Mitchell:

A number of people said that they feel weary when they reading a e-book. They are directly felt that when they get a half elements of the book. You can choose typically the book Secure Broadcast Communication: In Wired and Wireless Networks to make your reading is interesting. Your own skill of reading proficiency is developing when you just like reading. Try to choose easy book to make you enjoy to read it and mingle the idea about book and reading especially. It is to be initial opinion for you to like to start a book and examine it. Beside that the publication Secure Broadcast Communication: In Wired and Wireless Networks can to be your friend when you're experience alone and confuse in what must you're doing of these time.
