A Study of Braids (Mathematics and Its Applications)

Kunio Murasugi, B. Kurpita

A Study of Braids (Mathematics and Its Applications) Kunio Murasugi, B. Kurpita

In Chapter 6, we describe the concept of braid equivalence from the topological point of view. This will lead us to a new concept braid homotopy that is discussed fully in the next chapter. As just mentioned, in Chapter 7, we shall discuss the difference between braid equivalence and braid homotopy. Also in this chapter, we define a homotopy braid invariant that turns out to be the so-called Milnor number. Chapter 8 is a quick review of knot theory, including Alexander's theorem. While, Chapters 9 is devoted to Markov's theorem, which allows the application of this theory to other fields. This was one of the motivations Artin had in mind when he began studying braid theory. In Chapter 10, we discuss the primary applications of braid theory to knot theory, including the introduction of the most important invariants of knot theory, the Alexander polynomial and the Jones polynomial. In Chapter 11, motivated by Dirac's string problem, the ordinary braid group is generalized to the braid groups of various surfaces. We discuss these groups from an intuitive and diagrammatic point of view. In the last short chapter 12, we present without proof one theorem, due to Gorin and Lin [GoL], that is a surprising application of braid theory to the theory of algebraic equations.

From reader reviews:

Ellen McNulty:

Have you spare time for the day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book entitled A Study of Braids (Mathematics and Its Applications)? Maybe it is for being best activity for you. You already know beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with its opinion or you have different opinion?

John Edwards:

Reading a book tends to be new life style in this particular era globalization. With examining you can get a lot of information that may give you benefit in your life. Along with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Many author can inspire their very own reader with their story as well as their experience. Not only the story that share in the textbooks. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their skill in writing, they also doing some analysis before they write on their book. One of them is this A Study of Braids (Mathematics and Its Applications).

Darla Kemp:

A lot of people always spent their particular free time to vacation or go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book you read you can spent the whole day to reading a guide. The book A Study of Braids (Mathematics and Its Applications) it is quite good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. Should you did not have enough space bringing this book you can buy often the e-book. You can m0ore effortlessly to read this book from a smart phone. The price is not to cover but this book offers high quality.

James Smith:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from your book. Book is published or printed or outlined from each source that will filled update of news. On this modern era like today, many ways to get information are available for an individual. From media social such as newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the A Study of Braids (Mathematics and Its Applications) when you desired it?
