J. Vuyk, Stefan Schraag

Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology) J. Vuyk, Stefan Schraag

Since its launch in 1998 the European Society for Intravenous Anaesthesia (EuroSIVA) has come a long way in providing educational material and supporting the research and clinical application of intravenous anaesthesia. After the first two annual meetings held in Barcelona and Amsterdam in 1998 and 1999, three other successful meetings took place in Vienna, Gothenburg and Nice in 2000, 2001 and 2002. Next to these main meetings, starting in the year 2000, a smaller winter meeting has been organised every last week of January in Crans Montana, Switzerland. Both the main summer and the winter meetings breathe the same atmosphere of sharing the latest on intravenous anaesthesia research in the presence of a friendly environment and good company. Since the first meetings the educational tools of EuroSIVA have increased in quantity and technical quality allowing digital slide and video presentation along with the use of the computer simulation program TIVAtrainer during the speaker sessions and the workshops. Furthermore, EuroSIVA now exploits a website www. eurosiva. org that allows for continuous exchange of information on intravenous anaesthesia, the TIVAtrainer, the EuroSIVA meetings and online registration for these meetings. The EuroSIVA is currently engaged in friendly contacts with the Asian Oceanic Society for Intravenous Anaesthesia (AOSIVA), the United Kingdom Society for Intravenous Anaesthesia (UKSIVA), the Korean Society for Intravenous Anaesthesia (KSIVA), the European Society of Anaesthesiology (ESA) and the International Society for Applied Pharmacology (ISAP).

From reader reviews:

James Drake:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the book entitled Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology). Try to face the book Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology). Try to face the book Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology) as your close friend. It means that it can for being your friend when you sense alone and beside those of course make you smarter than ever before. Yeah, it is very fortuned for yourself. The book makes you a lot more confidence because you can know every thing by the book. So , let us make new experience in addition to knowledge with this book.

Maritza Kress:

The book Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology) can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology)? Wide variety you have a different opinion about publication. But one aim that will book can give many info for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or data that you take for that, you are able to give for each other; it is possible to share all of these. Book Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology) has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by start and read a e-book. So it is very wonderful.

Gordon Woods:

People live in this new time of lifestyle always make an effort to and must have the extra time or they will get wide range of stress from both day to day life and work. So, once we ask do people have extra time, we will say absolutely of course. People is human not a robot. Then we consult again, what kind of activity do you possess when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative in spending your spare time, typically the book you have read is Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology).

Theresa Kuykendall:

What is your hobby? Have you heard that question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person including reading or as studying become their hobby. You must know that reading is

very important as well as book as to be the issue. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is this Advances in Modelling and Clinical Application of Intravenous Anaesthesia (Advances in Experimental Medicine and Biology).
