This book diagnoses Cambodian teaching quality and presents policy options for reform. Through classroom observation, assessments of mathematics and pedagogical content knowledge, and surveys of teachers and school directors, it sheds light on content and instruction, interactions with school directors, instructional support systems, and the implementation of teacher standards. The book investigates the competencies and skills of those attracted to teaching; it assesses the extent to which preservice education in Cambodia is delivering graduates with high content mastery and exposure to a student-centered learning environment; and it examines how teacher performance has been impacted by national incentives, an evaluation system that is disconnected from classroom realities, and the extent to which opportunities to learn and share best-practice lessons with peers exists. Out of the diagnosis follow three policy pillars to reform how teachers are trained, maintained, and motivated. First, the government must make teaching a much more attractive profession. Second, it must improve how teachers are prepared. And third, it must encourage stronger classroom performance. The book contains detailed recommendations under each policy pillar and provides the platform for Cambodia to undertake its next generation of educational reform.

As a pupil exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country.
