# First Outline of a System of the Philosophy of Nature (SUNY series in Contemporary Continental Philosophy)

*F. W. J. Schelling*

## **First Outline of a System of the Philosophy of Nature (SUNY series in Contemporary Continental Philosophy) F. W. J. Schelling**

*Schelling's first systematic attempt to articulate a complete philosophy of nature.*

Appearing here in English for the first time, this is F. W. J. Schelling's vital document of the attempts of German Idealism and Romanticism to recover a deeper relationship between humanity and nature and to overcome the separation between mind and matter induced by the modern reductivist program. Written in 1799 and building upon his earlier work, *First Outline of a System of the Philosophy of Nature* provides the most inclusive exposition of Schelling's philosophy of the natural world. He presents a startlingly contemporary model of an expanding and contracting universe; a unified theory of electricity, gravity magnetism, and chemical forces; and, perhaps most importantly, a conception of nature as a living and organic whole.

Keith R. Peterson is Lecturer in Philosophy at St. Michael's College and Champlain College.
