Globalisation, Policy and Comparative Research: Discourses of Globalisation: 5 (Globalisation, Comparative Education and Policy Research)

Globalisation, Policy and Comparative Research, which is the fifth volume in the 12-volume book series Globalisation, Comparative Education and Policy Research, presents scholarly research on major discourses in comparative education research. It provides an easily accessible, practical yet scholarly source of information about the international concern in the field of globalisation, and comparative education. Above all, the book offers the latest findings to the critical issues concerning major discourses in comparative education in the global culture. It is a sourcebook of ideas for researchers, practitioners and policy makers in education, globalisation and equity and access in schooling around the world. It offers a timely overview of current issues affecting comparative education and education policy research in the global culture. It provides directions in education, and policy research, relevant to transformational educational reforms in the twenty-first century. The book critically examines the overall interplay between comparative education discourses, globalisation, dominant ideologies and education. It draws upon recent studies in the areas of globalisation, equity, social justice and the role of the State (Zajda et al. , 2006; Zajda et al. , 2008a). It explores conceptual frameworks and methodological approaches applicable in the research covering the State, globalisation, equity and education. It demonstrates the neo-liberal ideological imperatives of education and policy reforms, and illustrates the way the relationship between the State and education policy affects current models and trends in education reforms and schooling globally.
