## **Environment and Sustainability** Marivic Pabrua

This eBook is divided into five units: Introduction to Ecology, Components of the Environment, Population, Development, and Sustainable. Chapter 1: Introduction to Ecology. The three topics discussed in Chapter 1 provide basic background knowledge. It begins with the introduction to Ecology and its relationships to other sciences, as well as the importance of its study. “Chapter 2: Components of the Environment. This chapter explores the components of the environment, which are the biological components (biotic) and the physical components (abiotic). It describes the different types of biomes and the interactions of the organisms with their environment, as well as with other organisms. Chapter 2 also discusses how energy flows through ecosystems and matter moves in numerous cycles from one part of an ecosystem to another, from one organism to another, and from living organisms to the nonliving components of the environment and back again. It addresses the science of natural resources such as soil, water, wildlife and fossil fuels; their uses and availability and the consequences that arise when they are overexploited. Issues concerning the value of the natural services these resources render to mankind that are overlooked with their economic values are also addressed.
