Jacob T. Schwartz

Introduction to Matrices and Vectors (Dover Books on Mathematics) Jacob T. Schwartz
Realizing that matrices can be a confusing topic for the beginner, the author of this undergraduate text has made things as clear as possible by focusing on problem solving, rather than elaborate proofs. He begins with the basics, offering students a solid foundation for the later chapters on using special matrices to solve problems.

The first three chapters present the basics of matrices, including addition, multiplication, and division, and give solid practice in the areas of matrix manipulation where the laws of algebra do not apply. In later chapters the author introduces vectors and shows how to use vectors and matrices to solve systems of linear equations. He also covers special matrices — including complex numbers, quaternion matrices, and matrices with complex entries — and transpose matrices; the trace of a matrix; the cross product of matrices; eigenvalues and eigenvectors; and infinite series of matrices. Exercises at the end of each section give students further practice in problem solving.

Prerequisites include a background in algebra, and in the later chapters, a knowledge of solid geometry. The book was designed as an introductory text for college freshmen and sophomores, but selected chapters can also be used to supplement advanced high school classes. Professionals who need a better understanding or review of the subject will also benefit from this concise guide.

From reader reviews:

Betty Ahlstrom:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important for us. The book Introduction to Matrices and Vectors (Dover Books on Mathematics) was making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The e-book Introduction to Matrices and Vectors (Dover Books on Mathematics) is not only giving you a lot more new information but also being your friend when you really feel bored. You can spend your current spend time to read your e-book. Try to make relationship with all the book Introduction to Matrices and Vectors (Dover Books on Mathematics). You never really feel lose out for everything should you read some books.

Jennifer Byler:

Information is provisions for folks to get better life, information currently can get by anyone on everywhere. The information can be a expertise or any news even restricted. What people must be consider whenever those information which is inside former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you find the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Introduction to Matrices and Vectors (Dover Books on Mathematics) as the daily resource information.

David Soto:

Hey guys, do you would like to finds a new book to see? May be the book with the name Introduction to Matrices and Vectors (Dover Books on Mathematics) suitable to you? The particular book was written by popular writer in this era. The particular book untitled Introduction to Matrices and Vectors (Dover Books on Mathematics)is a single of several books that everyone read now. This particular book was inspired many men and women in the world. When you read this e-book you will enter the new dimension that you ever know prior to. The author explained their thought in the simple way, consequently all of people can easily to know the core of this publication. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this book.

Glen Hall:

Reading a book can be one of a lot of action that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a publication will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of many ways to share the information or even their idea. Second, reading through a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the characters do it anything. Third, you may share your knowledge to some others. When you

read this Introduction to Matrices and Vectors (Dover Books on Mathematics), it is possible to tells your family, friends and soon about yours book. Your knowledge can inspire others, make them reading a book.
