Signal and Image Processing for Remote Sensing

Signal and Image Processing for Remote Sensing

Most data from satellites are in image form, thus most books in the remote sensing field deal exclusively with image processing. However, signal processing can contribute significantly in extracting information from the remotely sensed waveforms or time series data. Pioneering the combination of the two processes, **Signal and Image Processing for Remote Sensing** provides a balance between the role of signal processing and image processing in remote sensing.

Featuring contributions from worldwide experts, this book emphasizes mathematical approaches. Divided into two parts, Part I examines signal processing for remote sensing and Part II explores image processing. Not limited to the problems with data from satellite sensors, the book considers other sensors which acquire data remotely, including signals and images from infrasound, seismic, microwave, and satellite sensors. It covers a broader scope of issues in remote sensing information processing than other books in this area.

With rapid technological advances, the mathematical techniques provided will far outlast the sensor, software and hardware technologies. Focusing on methodologies of signal processing and image processing in remote sensing, this book discusses unique techniques for dealing with remote sensing problems.

From reader reviews:

Karon Hall:

In this 21st century, people become competitive in most way. By being competitive today, people have do something to make these people survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that often many people have underestimated the item for a while is reading. Sure, by reading a book your ability to survive improve then having chance to stay than other is high. For yourself who want to start reading a book, we give you this particular Signal and Image Processing for Remote Sensing book as beginner and daily reading book. Why, because this book is usually more than just a book.

Cleveland Bolton:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your limited time to read it because all this time you only find e-book that need more time to be go through. Signal and Image Processing for Remote Sensing can be your answer given it can be read by an individual who have those short time problems.

June Whitaker:

A lot of guide has printed but it takes a different approach. You can get it by online on social media. You can choose the most beneficial book for you, science, witty, novel, or whatever through searching from it. It is named of book Signal and Image Processing for Remote Sensing. You can add your knowledge by it. Without leaving the printed book, it could add your knowledge and make an individual happier to read. It is most significant that, you must aware about guide. It can bring you from one destination to other place.

Tara Winston:

What is your hobby? Have you heard that will question when you got learners? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as reading become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update with regards to something by book. Numerous books that can you go onto be your object. One of them are these claims Signal and Image Processing for Remote Sensing.
