# Accounting For Managers: Interpreting Accounting Information for Decision-Making

*Paul M. Collier*

**Accounting For Managers: Interpreting Accounting Information for Decision-Making** Paul M. Collier  
This updated and revised fourth edition of *Accounting for Managers* builds on the international success of the previous editions in explaining how accounting is used by non-financial managers.

Emphasizing the interpretation rather than the construction of accounting information, *Accounting for Managers* encourages a critical, rather than an unthinking acceptance of accounting techniques. Whilst immensely valuable for planning, decision-making and control, users of accounting information need to recognize the assumptions behind, and the limitations of particular accounting techniques.

As in the previous editions, *Accounting for Managers* links theory with practical examples and case studies drawn from real business situations across a wide range of manufacturing, retail and service industries.
