Climate Change and Sustainable Cities

Climate Change and Sustainable Cities

Climate change has demonstrated, perhaps more than any other environmental concerns, the complexities of the human-nature interrelationship and the need for embedding a far greater environmental consciousness into our social values and norms. A drastic reduction in global greenhouse gas emissions requires a transition to low carbon cities. This demands a better understanding of the interactions between social, technical, and spatial processes which constitute cities.

The aim of this book is to explore these interactions and urge urban planners and other built environment professionals to revisit some of their traditional concepts, methods, and ways of thinking about what constitutes a 'good' city and according to whose priorities. The book brings together nine contributions ranging from broad overviews to sector-specific analysis, paying particular attention to the role of urban planning. Contributors cover climate change mitigation and adaptation, deal with different scales of analysis ranging from international and European to national and city perspectives, and discuss a range of policy sectors including housing, transport, energy, sea level rise as well as pathways for climate policy implementation. The diversity of the contributions is itself a reflection of the multitude of climate change concerns that preoccupy researchers, policy makers and practitioners.

This book was published as a special issue of *European Planning Studies*.

We all recommend that straight away because this publication has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to put every word into pleasure arrangement in writing Climate Change and Sustainable Cities nevertheless doesn't forget the main point, giving the reader the hottest in addition to based confirm resource facts that maybe you can be one among it. This great information can certainly drawn you into brand new stage of crucial pondering.

Sandra Black:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the educator want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Climate Change and Sustainable Cities can make you feel more interested to read.
