Neuropsicología del desarrollo infantil reúne los trabajos de destacados profesionistas latinoamericanos interesados en el estudio del desarrollo infantil desde una perspectiva neuropsicológica. Se divide en cuatro secciones. En la primera se introduce al tema a través de cuatro capítulos en los que se incluyen la historia de la neuropsicología infantil, el análisis del desarrollo cognitivo y conductual de los niños desde la perspectiva neuropsicológica, la maduración del sistema nervioso y el desarrollo de la asimetría cerebral. La segunda sección está abocada a la evaluación neuropsicológica y consta de dos capítulos en los que se incluyen los objetivos, pasos y métodos de la evaluación neuropsicológica infantil, así como la descripción de las pruebas más utilizadas en la práctica clínica con normas para países latinoamericanos. En la tercera sección se abordan las características de las dificultades específicas y globales de aprendizaje como ejemplos de trastornos del desarrollo infantil. La última sección describe perturbaciones neurológicas y neuropsiquiátricas de la infancia. En particular se consideran los problemas neuropsicológicos asociados a lesiones cerebrales tempranas, el trastorno de atención con hiperactividad y los trastornos del espectro autista. Esta obra está dirigida a estudiantes y profesionistas dedicados a la atención de niños en el ámbito escolar, tengan o no requerimientos de educación especial. Los psicólogos, fonoaudiólogos, neuropediatras, psiquiatras y neuropsicólogos encontrarán en él una herramienta de gran utilidad para el ámbito profesional.
