Value Recovery from the Reverse Logistics Pipeline RAND Corporation, Eric Peltz, Arthur Lackey, Darlene J. Blake, Karthik Vaidyanathan

Value recovery, in the form of the return and repair of reparable spare parts, involves sizable investments of time and inventory. This monograph describes metrics developed to evaluate the Army's retrograde processes. Baseline repair times were found to be long: over a month for items repaired below depot and returned to stock. The authors suggest ways to speed up the movement of parts through the system to minimize the size of the parts inventory.
