Application Servers for E-Business LISA M. LINDGREN

Application Servers for E-Business presents a comprehensive overview of the technologies related to application servers in their facilitation of E-business. These technologies includes CORBA, Java, Enterprise Java Beans, Java 2, web servers, and legacy systems. It explores the role these servers play in the modern enterprise IT infrastructure and the environment in which they operate. The material also includes implementation considerations for application servers, including security, scalability, load balancing, and fault tolerance.
