## Citizenship Education And The Modern State

Citizenship education has recently re-emerged as an important issue, both in policy and in practice. As the nation state undergoes rapid transformation at the end of the 20th century, both Eastern and Western states have focused attention on using the school curriculum as a medium for sustaining cohesion and unity within society. But, as we approach the 21st century, is the possibility of a common citizenship a reality?; This book is designed to provide educators with access to ideas and information that will help them to understand current citizenship- education initiatives across a number of countries. It provides a theoretical rationale in which to consider those issues; illustrates how such issues are being worked out in practice in a number of countries; and provides assistance for policy makers, teacher educators and teachers who are responsible for making decisions about the context of citizenship education programmes for schools.
