The British Nuclear Experience: The Roles of Beliefs, Culture and Identity John Baylis, Kristan Stoddart

Based on a detailed analysis of archives and high level interviews this book looks at the role of beliefs, culture and identity in the making of British nuclear policy from 1945 through to the present day. This book also examines Britain's nuclear experience by moving away from traditional interpretations of why states develop and maintain nuclear weapons by adopting a more contemporary approach to political theory.

Traditional mainstream explanations tend to stress the importance of factors such as the 'maximization of power', the pursuit of 'national security interests' and the role of 'structure' in a largely anarchic international system. This book does not dismiss these approaches, but argues that British experience suggests that focusing on 'beliefs', 'culture' and 'identity', provides a more useful insight and distinctive interpretation into the process of British nuclear decision making than the more traditional approaches.
