# Applied Missing Data Analysis in the Health Sciences (Statistics in Practice)

*Xiao-Hua Zhou, Chuan Zhou, Danping Lui, Xaiobo Ding*

**Applied Missing Data Analysis in the Health Sciences (Statistics in Practice)** Xiao-Hua Zhou, Chuan Zhou, Danping Lui, Xaiobo Ding

**A modern and practical guide to the essential concepts and ideas for analyzing data with missing observations in the field of biostatistics**

With an emphasis on hands-on applications, *Applied Missing Data Analysis in the Health Sciences* outlines the various modern statistical methods for the analysis of missing data. The authors acknowledge the limitations of established techniques and provide newly-developed methods with concrete applications in areas such as causal inference methods and the field of diagnostic medicine.

Organized by types of data, chapter coverage begins with an overall introduction to the existence and limitations of missing data and continues into traditional techniques for missing data inference, including likelihood-based, weighted GEE, multiple imputation, and Bayesian methods. The book's subsequently covers cross-sectional, longitudinal, hierarchical, survival data. In addition, *Applied Missing Data Analysis in the Health Sciences* features:

- Multiple data sets that can be replicated using the SAS®, Stata®, R, and WinBUGS software packages
- Numerous examples of case studies in the field of biostatistics to illustrate real-world scenarios and demonstrate applications of discussed methodologies
- Detailed appendices to guide readers through the use of the presented data in various software environments

*Applied Missing Data Analysis in the Health Sciences* is an excellent textbook for upper-undergraduate and graduate-level biostatistics courses as well as an ideal resource for health science researchers and applied statisticians.

### **From reader reviews:**

#### **Edward Robinette:**

As people who live in the actual modest era should be change about what going on or info even knowledge to make them keep up with the era which can be always change and make progress. Some of you maybe will update themselves by examining books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This Applied Missing Data Analysis in the Health Sciences (Statistics in Practice) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

#### **Donald Tuel:**

Your reading sixth sense will not betray anyone, why because this Applied Missing Data Analysis in the Health Sciences (Statistics in Practice) publication written by well-known writer we are excited for well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, dripping every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Applied Missing Data Analysis in the Health Sciences (Statistics in Practice) as good book but not only by the cover but also with the content. This is one publication that can break don't determine book by its protect, so do you still needing a different sixth sense to pick this!? Oh come on your studying sixth sense already alerted you so why you have to listening to yet another sixth sense.

#### **Diane Welton:**

Many people spending their period by playing outside along with friends, fun activity with family or just watching TV the whole day. You can have new activity to spend your whole day by examining a book. Ugh, you think reading a book can really hard because you have to use the book everywhere? It alright you can have the e-book, bringing everywhere you want in your Smartphone. Like Applied Missing Data Analysis in the Health Sciences (Statistics in Practice) which is finding the e-book version. So , why not try out this book? Let's view.

#### **Anthony Muller:**

Don't be worry in case you are afraid that this book can filled the space in your house, you might have it in e-book method, more simple and reachable. This specific Applied Missing Data Analysis in the Health Sciences (Statistics in Practice) can give you a lot of friends because by you checking out this one book you have factor that they don't and make a person more like an interesting person. This specific book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't realize, by knowing more than different make you to be great folks. So , why hesitate? We need to have Applied Missing Data Analysis in the Health Sciences (Statistics in Practice).
