Applied Regression Analysis (Springer Texts in Statistics)

John O. Rawlings

Applied Regression Analysis (Springer Texts in Statistics) John O. Rawlings

Least squares estimation, when used appropriately, is a powerful research tool. A deeper understanding of the regression concepts is essential for achieving optimal benefits from a least squares analysis. This book builds on the fundamentals of statistical methods and provides appropriate concepts that will allow a scientist to use least squares as an effective research tool.

Applied Regression Analysis is aimed at the scientist who wishes to gain a working knowledge of regression analysis. The basic purpose of this book is to develop an understanding of least squares and related statistical methods without becoming excessively mathematical. It is the outgrowth of more than 30 years of consulting experience with scientists and many years of teaching an applied regression course to graduate students.

Applied Regression Analysis serves as an excellent text for a service course on regression for non-statisticians and as a reference for researchers. It also provides a bridge between a two-semester introduction to statistical methods and a theoretical linear models course.

Applied Regression Analysis emphasizes the concepts and the analysis of data sets. It provides a review of the key concepts in simple linear regression, matrix operations, and multiple regression. Methods and criteria for selecting regression variables and geometric interpretations are discussed. Polynomial, trigonometric, analysis of variance, nonlinear, time series, logistic, random effects, and mixed effects models are also discussed. Detailed case studies and exercises based on real data sets are used to reinforce the concepts. The data sets used in the book are available on the Internet.

From reader reviews:

Jon Farris:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each book has different aim or goal; it means that book has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are really reading whatever they acquire because their hobby is actually reading a book. How about the person who don't like reading through a book? Sometime, individual feel need book whenever they found difficult problem or even exercise. Well, probably you will require this Applied Regression Analysis (Springer Texts in Statistics).

James Rodriguez:

The book Applied Regression Analysis (Springer Texts in Statistics) make you feel enjoy for your spare time. You may use to make your capable far more increase. Book can to get your best friend when you getting tension or having big problem with the subject. If you can make looking at a book Applied Regression Analysis (Springer Texts in Statistics) to be your habit, you can get much more advantages, like add your personal capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like open up and read a reserve Applied Regression Analysis (Springer Texts in Statistics). Kinds of book are a lot of. It means that, science publication or encyclopedia or some others. So , how do you think about this e-book?

Jean Cunningham:

Reading can called imagination hangout, why? Because if you are reading a book especially book entitled Applied Regression Analysis (Springer Texts in Statistics) your head will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will become your mind friends. Imaging each word written in a publication then become one form conclusion and explanation in which maybe you never get ahead of. The Applied Regression Analysis (Springer Texts in Statistics) giving you one more experience more than blown away your brain but also giving you useful information for your better life on this era. So now let us demonstrate the relaxing pattern is your body and mind is going to be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

Sophie Clark:

Many people spending their time frame by playing outside having friends, fun activity with family or just watching TV all day long. You can have new activity to enjoy your whole day by studying a book. Ugh, do you think reading a book really can hard because you have to take the book everywhere? It okay you can have the e-book, getting everywhere you want in your Touch screen phone. Like Applied Regression Analysis (Springer Texts in Statistics) which is keeping the e-book version. So , why not try out this book? Let's view.
