Heterogeneous Catalysis at Nanoscale for Energy Applications

Franklin (Feng) Tao, William F. Schneider, Prashant V. Kamat

Heterogeneous Catalysis at Nanoscale for Energy Applications Franklin (Feng) Tao, William F. Schneider, Prashant V. Kamat

This book presents both the fundamentals concepts and latest achievements of a field that is growing in importance since it represents a possible solution for global energy problems. It focuses on an atomic-level understanding of heterogeneous catalysis involved in important energy conversion processes. It presents a concise picture for the entire area of heterogeneous catalysis with vision at the atomic- and nano- scales, from synthesis, ex-situ and in-situ characterization, catalytic activity and selectivity, to mechanistic understanding based on experimental exploration and theoretical simulation.

The book:

- Addresses heterogeneous catalysis, one of the crucial technologies employed within the chemical and energy industries
- Presents the recent advances in the synthesis and characterization of nanocatalysts as well as a mechanistic understanding of catalysis at atomic level for important processes of energy conversion
- Provides a foundation for the potential design of revolutionarily new technical catalysts and thus the further development of efficient technologies for the global energy economy
- Includes both theoretical studies and experimental exploration
- Is useful as both a textbook for graduate and undergraduate students and a reference book for scientists and engineers in chemistry, materials science, and chemical engineering

From reader reviews:

Danielle Smith:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Together with book everyone in this world may share their idea. Books can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only the storyplot that share in the guides. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors on earth always try to improve their expertise in writing, they also doing some investigation before they write to the book. One of them is this Heterogeneous Catalysis at Nanoscale for Energy Applications.

Margaret Gentile:

Reading can called mind hangout, why? Because if you are reading a book specifically book entitled Heterogeneous Catalysis at Nanoscale for Energy Applications your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unknown for but surely might be your mind friends. Imaging each and every word written in a guide then become one form conclusion and explanation this maybe you never get ahead of. The Heterogeneous Catalysis at Nanoscale for Energy Applications giving you another experience more than blown away your mind but also giving you useful data for your better life within this era. So now let us explain to you the relaxing pattern this is your body and mind is going to be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Nelson Wyatt:

Would you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't assess book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer might be Heterogeneous Catalysis at Nanoscale for Energy Applications why because the great cover that make you consider with regards to the content will not disappoint anyone. The inside or content is actually fantastic as the outside or cover. Your reading sixth sense will directly guide you to pick up this book.

Antonio Fells:

In this period of time globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. Often the book that recommended to you is Heterogeneous Catalysis at Nanoscale for Energy Applications this guide consist a

lot of the information with the condition of this world now. This particular book was represented how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. The writer made some investigation when he makes this book. This is why this book suited all of you.
