Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications
Daniel Minoli

"If we had computers that knew everything there was to know about things—using data they gathered without any help from us—we would be able to track and count everything, and greatly reduce waste, loss, and cost. We would know when things needed replacing, repairing or recalling, and whether they were fresh or past their best. The Internet of Things has the potential to change the world, just as the Internet did. Maybe even more so."
—Kevin Ashton, originator of the term, Internet of Things

An examination of the concept and unimagined potential unleashed by the Internet of Things (IoT) with IPv6 and MIPv6

What is the Internet of Things? How can it help my organization? What is the cost of deploying such a system? What are the security implications? *Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications* answers these questions and many more.

This essential book explains the concept and potential that the IoT presents, from mobile applications that allow home appliances to be programmed remotely, to solutions in manufacturing and energy conservation. It features a tutorial for implementing the IoT using IPv6 and Mobile IPv6 and offers complete chapter coverage that explains:

- What is the Internet of Things?
- Internet of Things definitions and frameworks
- Internet of Things application examples
- Fundamental IoT mechanisms and key technologies
- Evolving IoT standards
- Layer 1/2 connectivity: wireless technologies for the IoT
- Layer 3 connectivity: IPv6 technologies for the IoT
- IPv6 over low power WPAN (6lowpan)

Easily accessible, applicable, and not overly technical, *Building the Internet of Things with IPv6 and MIPv6* is an important resource for Internet and ISP providers, telecommunications companies, wireless providers, logistics professionals, and engineers in equipment development, as well as graduate students in computer science and computer engineering courses.

From reader reviews:

Alan Castorena:

The book Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications will bring someone to the new experience of reading the book. The author style to spell out the idea is very unique. In case you try to find new book to study, this book very suitable to you. The book Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications is much recommended to you to read. You can also get the e-book from your official web site, so you can quickly to read the book.

Julio Yates:

The reserve with title Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications includes a lot of information that you can study it. You can get a lot of profit after read this book. This particular book exist new information the information that exist in this reserve represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. This particular book will bring you with new era of the internationalization. You can read the e-book on your smart phone, so you can read the item anywhere you want.

John Sorrells:

Does one one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't evaluate book by its handle may doesn't work the following is difficult job because you are scared that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer can be Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications why because the fantastic cover that make you consider concerning the content will not disappoint you actually. The inside or content is usually fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.

Krystal Wilson:

Are you kind of stressful person, only have 10 or 15 minute in your time to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your limited time to read it because this all time you only find guide that need more time to be study. Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications can be your answer because it can be read by you who have those short extra time problems.
