Eric Sheppard, Trevor Barnes

The Capitalist Space Economy (Routledge Library Editions: Economic Geography): Geographical Analysis after Ricardo, Marx and Sraffa Eric Sheppard, Trevor Barnes

Representing an innovative approach to the analysis of the economic geography of capitalism, this stimulating book develops an analytical political economic framework. Part 1 provides an introductory overview of some of the fundamental debates about price, profits and value in economics which underlie the analytical political economy approach. Part 2 analyzes the special role of space and transportation in commodity production and the spatial organization of the economy that this implies. Parts 3 and 4 examine the conflicting goals and actions of different social classes and individuals and how these are complicated by space, concluding with a detailed analysis of capitalists' strategies as they cope with uncertainty and disequilibrium.
