The Global Governance of Knowledge Creation and Diffusion (Routledge/GARNET series)

The Global Governance of Knowledge Creation and Diffusion (Routledge/GARNET series)

There is an increasing scientific and political sensibility for questions regarding the "governance of a knowledge society" and the societal benefits and problems of a "knowledge economy".

The Global Governance of Knowledge provides a survey and analysis of international agreements and institutions, global and regional, which regulate the creation and dissemination of knowledge. The volume utilises case studies and a comparative country / thematic approach to provide a comprehensive survey of the regulation and governance of knowledge flow, research and innovation. By identifying activities creating new knowledge, such as education and migration, it demonstrates how knowledge regulation and diffusion works in practice and policy.

The book will be of interest to students and scholars of globalization, international relations and policy regulation.
