From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs)

Beatriz León, Antonio Morales, Joaquin Sancho-Bru

From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs) Beatriz León, Antonio Morales, Joaquin Sancho-Bru

The human hand and its dexterity in grasping and manipulating objects are some of the hallmarks of the human species. For years, anatomic and biomechanical studies have deepened the understanding of the human hand's functioning and, in parallel, the robotics community has been working on the design of robotic hands capable of manipulating objects with a performance similar to that of the human hand. However, although many researchers have partially studied various aspects, to date there has been no comprehensive characterization of the human hand's function for grasping and manipulation of everyday life objects.

This monograph explores the hypothesis that the confluence of both scientific fields, the biomechanical study of the human hand and the analysis of robotic manipulation of objects, would greatly benefit and advance both disciplines through simulation. Therefore, in this book, the current knowledge of robotics and biomechanics guides the design and implementation of a simulation framework focused on manipulation interactions that allows the study of the grasp through simulation. As a result, a valuable framework for the study of the grasp, with relevant applications in several fields such as robotics, biomechanics, ergonomics, rehabilitation and medicine, has been made available to these communities.

From reader reviews:

Ernest Keeler:

Have you spare time for a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a move, shopping, or went to the Mall. How about open or maybe read a book entitled From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs)? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have different opinion?

Denise Lee:

Typically the book From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs) will bring that you the new experience of reading some sort of book. The author style to spell out the idea is very unique. In the event you try to find new book to study, this book very suited to you. The book From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs) is much recommended to you you just read. You can also get the e-book in the official web site, so you can more readily to read the book.

Glenn Stops:

Beside this From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs) in your phone, it could give you a way to get closer to the new knowledge or information. The information and the knowledge you can got here is fresh from oven so don't always be worry if you feel like an previous people live in narrow small town. It is good thing to have From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs) because this book offers for your requirements readable information. Do you often have book but you rarely get what it's interesting features of. Oh come on, that wil happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss this? Find this book and also read it from now!

Rebecca Farley:

A lot of book has printed but it differs from the others. You can get it by online on social media. You can choose the best book for you, science, comic, novel, or whatever simply by searching from it. It is referred to as of book From Robot to Human Grasping Simulation: 19 (Cognitive Systems Monographs). You'll be able to your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make you happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination for a other place.
