**Spectral Analysis of Musical Sounds with Emphasis on the Piano** David M. Koenig, Delwin D. Fandrich  
This book addresses the analysis of musical sounds from the viewpoint of someone at the intersection between physicists, engineers, piano technicians, and musicians.

The study is structured into three parts. The reader is introduced to a variety of waves and a variety of ways of presenting, visualizing, and analyzing them in the first part. A tutorial on the tools used throughout the book accompanies this introduction. The mathematics behind the tools is left to the appendices. Part Two provides a graphical survey of the classical areas of acoustics that pertain to musical instruments: vibrating strings, bars, membranes, and plates. Part Three is devoted almost exclusively to the piano. Several two- and three-dimensional graphical tools are introduced to study various characteristics of pianos: individual notes and interactions among them, the missing fundamental, inharmonicity, tuning visualization, the different distribution of harmonic power for the various zones of the piano keyboard, and potential uses for quality control. These techniques are also briefly applied to other musical instruments studied in earlier parts of the book.

For physicists and engineers there are appendices to cover the mathematics lurking beneath the numerous graphs and a brief introduction to MatlabRG which was used to generate these graphs. A website accompanying the book (<https://sites.google.com/site/analysisofsoundsandvibrations/>) contains:

- Matlab® scripts
- mp3 files of sounds
- references to YouTube videos
- and up-to-date results of recent studies

### **From reader reviews:**

#### **David Robinson:**

Book is to be different for each grade. Book for children until adult are different content. We all know that that book is very important for us. The book Spectral Analysis of Musical Sounds with Emphasis on the Piano seemed to be making you to know about other expertise and of course you can take more information. It is quite advantages for you. The guide Spectral Analysis of Musical Sounds with Emphasis on the Piano is not only giving you much more new information but also being your friend when you feel bored. You can spend your own spend time to read your publication. Try to make relationship together with the book Spectral Analysis of Musical Sounds with Emphasis on the Piano. You never experience lose out for everything if you read some books.

#### **Pauline Jones:**

In this 21st centuries, people become competitive in each way. By being competitive today, people have do something to make these survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yes, by reading a guide your ability to survive boost then having chance to stand up than other is high. For you personally who want to start reading a new book, we give you this Spectral Analysis of Musical Sounds with Emphasis on the Piano book as beginner and daily reading publication. Why, because this book is more than just a book.

#### **Joseph Dolezal:**

Now a day folks who Living in the era just where everything reachable by talk with the internet and the resources within it can be true or not need people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the answer is reading a book. Examining a book can help individuals out of this uncertainty Information specially this Spectral Analysis of Musical Sounds with Emphasis on the Piano book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you may already know.

#### **Richard Moultrie:**

Playing with family in a very park, coming to see the ocean world or hanging out with friends is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Spectral Analysis of Musical Sounds with Emphasis on the Piano, you are able to enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't get it, oh come on its called reading friends.
